SOAPUI ARCHITECTURE

www.youritmentor.in

Training Support :
Selenium, QTP, LoadRunner,
Jmeter, SoapUI, Manual
Testing, Mobile automation,
Certifications training

group of industry experts
CALL or WHATSAPP: 8743913121

No
Programming
Prerequisite

Training by Industry Working Experts, Trained more than 300 professionals **8743913121**

Our Students feedback

Trainer Profile

8+ Yrs Exp(Manual + Automation Testing)

ISTQB, QTP, QC, Loadrunner, CMAT, SoapUI certified

Trained more than 1000 professionals

Service & API testing products from Smartbear

SoapUI NG : Unit and Functional Testing

LoadUI : Performance Testing

Secure : For Security Testing

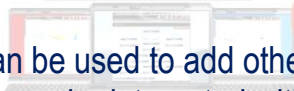

ServiceV : Service Virtualization

SoapUI provide plugins which can be used to add other options in SoapUI
Example: With SoapUI plugin, it can be integrated with Eclipse

Components with SoapUI tool

Jetty :: Service Virtualization / Mock Service

We can create replica of service in case when service is not ready or so buggy to test, in mean time we want to create our test cases, for that we can do service virtualization and use that service

Jetty is used for hosting virtual service
Provided by Eclipse, java based web server
Works for both Soap and Rest

Jasper :: Is used to generate reports

Open source reporting tool

Saxon XSLT & Xquery processor

We can use Xpath and Xquery to process service results

Saxon platform provide us option to process results using Xpath and XQuery

Log4J

Used for Logging
Provide following logs (SoapUI Logs, Error Logs, Http, Jetty, Memory)

JDBC driver

To interact with database

HermesJMS

Is used in applications where high volume of transactions take place

It is used to send message to JMS Queue

Receiver results from JMS Queue

We can incorporate Java JMS using Hermes JMS

Scripting Language

We can choose with groovy or Java Script

We can select language for each project

We can set language at project property level

Monitoring

To check what is send to the service and what is received from the service

We can use monitoring

2 types

TCP Mon

Http Mon(Majorly used)

1. Http Requests
2. XML
3. JSON etc

Runner

Execution can be run without using SoapUI

From Command Line

```
testRunner  
loadtestrunner  
securitytestrunner  
mockservicerunner
```

Can also be executed from build tools

Supported Protocols

XML
XML-RPC
SOAP
HTTP
AMF
JDBC
